

Bursa Metropolitan Municipality Administration Building

Bursa, one of the fastest developing and most invested cities in Turkey, was announced to become a Metropolitan Municipality in 1987 with the law no. 3391. Still serving at historical municipal building which was built in 1879 with the order of Ahmet Vefik Paşa, Bursa Metropolitan Municipality planned to organize all administrative departments under one roof at the location of old green bazaar which lays on 39.000 m2 of land.

In this project, 4 blocks occupying only 8 thousand m2 of land will be constructed by Gintaş Construction Contracting and Trade Inc. and due to the low land-usage, the Project would become a vital urban development while creating additional value for the area.

Administration Building will host the administrative and labor departments of Bursa Metropolitan Municipality. In addition, a polyclinic, seminary and multi-purpose halls, exhibition hall, dining hall and cafes are planned in this project. 15.000 m2 of land is going to be developed as green areas and will include children playgrounds, running tracks, sitting areas and cafes. A new pedestrian walk-way is planned between green areas and Administration Building which also connect Zafer District to Ankara Main Road.
